FERC announces public comment period for ACP restoration issues

A scoping period to provide the public an opportunity to comment on the proposed restoration plan for the route of the Atlantic Coast Pipeline, which was cancelled on July 5, 2020, has been announced by the Federal Energy Regulatory Commission (FERC). The March 2 notice issued by FERC explains that the Commission is seeking “input from the public and interested agencies regarding the proposed restoration activities associated with the disposition of the Atlantic Coast and Supply Header Projects.” All comments will be due by April 16, 2021 at 5 pm.

Atlantic Coast Pipeline, LLC had filed a project disposition and restoration plan with FERC on January 4, 2021 (click here for details on and a link to the plan). A similar plan for the Supply Header Project (SHP) was submitted on November 20, 2020 by Eastern Gas Transmission and Storage, the successor company to Dominion Energy Transmission, Inc., which formerly owned the SHP (click here for a copy). FERC had initially not planned on accepting public comments on the plans other than on the agency’s public docket. Several ABRA members filed comments on the FERC docket on February 9 voicing several concerns about the ACP restoration plan (click here for more information).

A copy of the FERC scoping notice calling for comments for both projects, including instructions on how to file, is available here.

Comments on MVP stream crossing proposal due March 22

A February 19 proposal by Mountain Valley Pipeline, LLC (MVP, LLC) to the Federal Energy Regulatory Commission (FERC) asking for authority to have the Mountain Valley Pipeline change the method for wetlands and waterbodies will be open for public comments. The deadline for comment submission is March 22. The request to FERC asks approval of a change from “the open-cut crossings that were authorized by the Certificate to one of several trenchless methods. Mountain Valley proposes to use trenchless methods at 120 locations to cross 181 waterbodies and wetlands that the Commission originally authorized as open-cut.” A link to the request by MVP, LLC is available here. A copy of the FERC notice is here.

Blackjewel’s bankruptcy is a harbinger of trouble ahead for the plummeting coal industry
- Courier-Journal – 3/3/21 (reprint from Inside Climate News, which has a subscription wall.
  Bonding requirements, supposed to provide funds for cleanup in the event of bankruptcy, are totally inadequate. The system we never designed for the entire industry to go bankrupt.

Dominion Cleaning by Greening, but Natural Gas Not a Goner
- Natural Gas Intelligence – 2/23/21
  Important takeaway: “We have identified over $70 billion of green investment opportunity between 2020 and 2035, nearly all of which will qualify for regulated cost of service recovery.” – Tom Farrell. The ACP may be dead, but Tommy is still coming for your wallet! This highlights that the "public interest" clauses in Virginia’s clean energy legislation cut both ways. We get clean energy, but with Dominion’s price tag.
Dominion plans to build nearly 200 giant wind turbines off Virginia. But getting that energy into the grid won’t be easy.

Big Picture:

Reversing Trump, Interior Department Moves Swiftly on Climate Change
As the Interior Department awaits its new secretary, the agency is already moving to lock in key parts of President Biden's environmental agenda, particularly on oil and gas restrictions, laying the groundwork to fulfill some of the administration’s most consequential climate change promises.

FERC pipeline eminent domain fight heats up
- E&E Energywire – 3/4/21
A firestorm over eminent domain rights is brewing at the Federal Energy Regulatory Commission as public advocates, environmentalists and states call for changes to the agency's natural gas permitting process, while developers urge caution.
